Javoxir Jumabayev, Frontend Developer (Intern) | Tashkent, Uzbekistan | +998 97 548 07 10
| Email | github | linkedin | portfolio.site

I'm actively looking for front-end internships and junior roles. Whether you represent a top-tier company or an ambitious startup, I'm even ready to work **without salary**, just to get real experience and improve my skills. Let's talk!

CORE SKILLS
• **Languages**: HTML5, CSS3/SCSS, JavaScript (ES6+), TypeScript (basic), React, Next.js
• **UI & Styling**: Responsive design, Tailwind CSS, Styled-Components, Figma-to-code, BEM methodology
• **Tools & Workflows**: Git, GitHub, Vite, Webpack, npm, ESLint, Prettier, Husky CI hooks
• **Testing & Perf**: Jest, React Testing Library, Chrome DevTools, Lighthouse, Core Web Vitals optimization

PROJECT EXPERIENCE
UnumMarket — React + Firebase [Link]
• Only for mobile. Built a real-time e-commerce frontend with Firebase backend. Includes cart, order workflows, and responsive UI optimized for speed and mobile users.
GMT Health — React + Tailwind [Link]
• Developed a responsive landing page for a company selling medical equipment and transport vehicles to hospitals and clinics. Focused on clean UI, visual trust, and clear product presentation using React and Tailwind CSS.
Green Shop — [Link]
• Created a modern online store UI with product listing, filtering, and cart logic. Clean codebase, component-based architecture, and fully responsive layout.
Apple iPhone 15 Clone — [Link]
• Recreated Apple's iPhone 15 landing page with React and Tailwind CSS using Vite for lightning-fast development. Focused on layout fidelity, responsive design, and clean code standards enforced with ESLint.
UIC Group clone — [Link]
• Rebuilt the UIC corporate site as a React clone, implementing reusable UI components, responsive grid systems, and optimized image delivery for performance.
Notivo — IELTS Essay AI Checker — [Link] without backend, with api
• Frontend for an AI-powered IELTS writing checker. Integrated API endpoints, dynamic essay analysis UI, and mobile-first design. Focused on UX and API reliability.
